The vital importance of this Gulf Intercoastal Waterway, engineered and regulated by the United States, is explained here:

<http://www.gicaonline.com/pages/initiatives/promotion.htm>

AMTS is ideal for the nations' broad-use (not restricted single-entity use) maritime and land transportation systems and services: AMTS should not be wasted in uses, that cut into transportation uses, in other applications (such as fixed-site land communications) where higher-range spectrum is suitable and available, such as various 900 and 1400 MHz spectrum. See text of this pleading.
